LIGHTING  
CATALOGUE

## Our Heritage

Since 1997, founders John Fearon and James Bassant have shared a passion for British lighting design and a vision to create products with distinctive quality.

The insight gained over this time influences our comprehensive range of lighting for hospitality, residential, senior living, and commercial applications.

Underpinned by a meticulous attention to detail, each design balances high performance with our commitment to sustainable, timeless design.

# Creating a Sustainable Future

Responsible design is about being mindful of the whole lifecycle of our products. From the initial concept through to the end of a luminaire's life. Our three prioritised commitments guide each decision we make and are linked to the UN Global Goals for Sustainable Development.

---

## Net Zero

Committed to going further than carbon neutrality, we are actively reducing emissions across our entire value chain with the aim of becoming a net zero contributor.

## Astro Circular

Transforming our approach to design and engineering, we are minimising our impact on the planet. By adopting circular loops we can reduce, reuse, repair and recycle, extending the lifespan of our products.

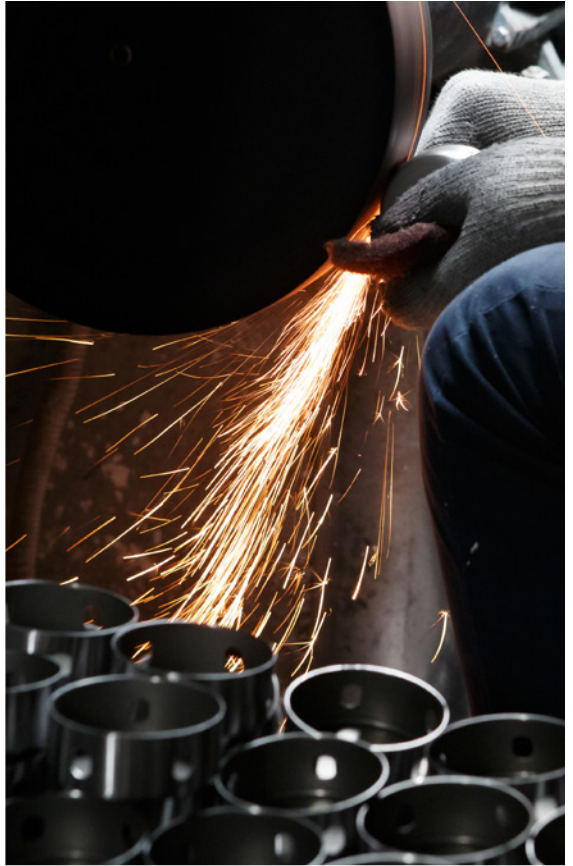

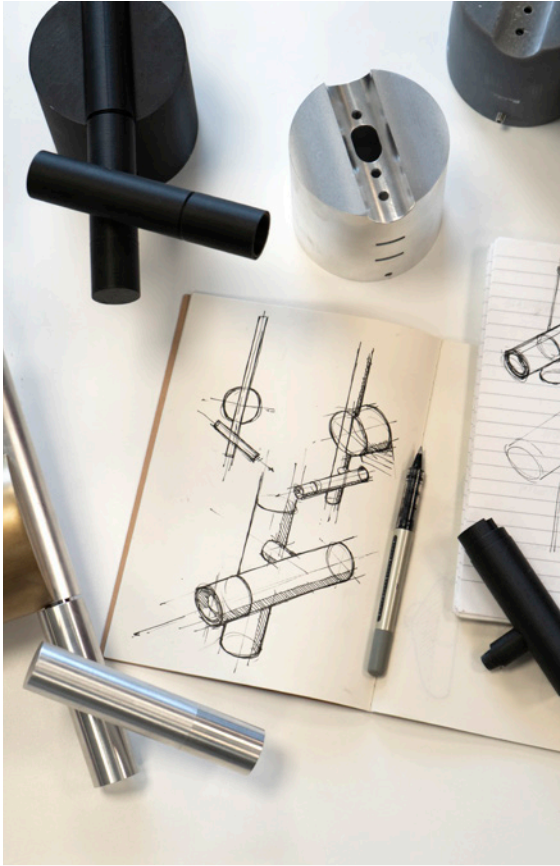

## Light For All

Nearly 600 million people across sub-Saharan Africa lack access to light but this can change instantly with a simple solar light. Our partnership with global charity SolarAid, aims to spread awareness of this global energy crisis and support the most remote communities in Malawi and Zambia with clean, safe, solar power.
